

Dear _____
(decision maker)

Right now world leaders are making critical decisions about conservation. Currently only 15% of the Earth's land and 7% of the ocean is protected worldwide. Experts agree that protecting special places helps our communities, wildlife, and ocean environments thrive in the face of natural disasters and climate change.

Please support the science-driven global call to protect 30% of the ocean and land by 2030 and help protect the environment for future generations.
